## Short Answers

essays. Sometimes a few words will do, other times you may need as much as a paragraph.
1. What are three adjectives your friends would use to describe you?
2. Please list three books, along with their authors, that have been particularly meaningful to you. You need not confine yourself to math- or science-related texts.
3. Members of the Caltech community live, learn, and work within an Honor System with one simple guideline, "No member shall take unfair advantage of any other member of the Caltech community." While seemingly simple, questions of ethics, honesty, and integrity are sometimes challenging. Share an ethical dilemma that challenged you. What did you do?

4. Caltech students have long been known for their quirky sense of humor and creative pranks and for finding unusual ways to have fun. What is something that you find fun or humorous?

## Essay

Interest in math, science, or engineering manifests itself in many forms. Caltech professor and Nobel Laureate Richard Feynman (1918-1988) explained, "I'd make a motor, I'd make a gadget that would go off when something passed a photocell, I'd play around with selenium"; he was exploring his interest in science, as he put it, by "piddling around all the time." In a page, more or less, tell the Admissions Committee how you express your interest, curiosity, or excitement about math, science or engineering.

Before answering this question, you might ask those around you—family, friends, or teachers—how they see you as a mathematician, scientist or engineer. They may offer insightful observations!
